Professional Summary

Professional software engineer with 4+ years of experience and extensive knowledge of the software development life-cycle.

In my last position, as a senior engineer in backend team, I did everything I could to improve the productivity of my team.

For example, I popularized testing, taught many things need to know to our members, and built a CI/CD pipeline so that we could release high-quality applications quickly.

Work Experience

Senior Software Engineer

EISYS, Inc.

Feb 2020 - Mar 2022

- TODO

Full-stack Engineer

Freelance

Feb 2019 - Jan 2020

Involved in all phases of the software development life-cycle.

- Create and maintain web site
 - launch website to use AWS
- Create API for delivery management system(Python)
 - mainly responsible for coding and testing
- Create in-house business improvement application(Laravel)
 - I involved in all phases of the software development life-cycle from idea to deploy
 - I not only created it, but also communicated with users so that they could use it willingly.
As a result, I was able to release excellent software that automates tedious tasks in a short period of time.
